*South Africa's Post-Apartheid Military* Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

**Stopping the Spies** Jane Duncan, 2018-06-01 Is South Africa on its way to becoming a surveillance state and will it need a whistleblower? In 2013, former National Security Agency (NSA) contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the communications of millions of innocent citizens. International outrage resulted, but the Snowden documents revealed only the tip of the surveillance iceberg. Apart from insisting on their rights to tap into communications, more and more states are placing citizens under surveillance, tracking their movements and transactions with public and private institutions. The state is becoming like a one-way mirror where it can see more of what its citizens do and say while citizens see less and less of what the state does, owing to high levels of secrecy around surveillance. In this book, Jane Duncan assesses the relevance of Snowden's revelations for South Africa. In doing so, she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state. Duncan challenges members of civil society to be concerned about and to act on the ever-expanding surveillance capacities of the South African state. Is surveillance used for the democratic purpose of making people safer or is it being used for the repressive purpose of social control, especially of those considered to be politically threatening to ruling interests? She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses.
