## Riddled With Factoring:

*The Luck Factor (Harriman Classics)* Max Gunther, 2020-08-11 Max Gunther's classic text with a new foreword by Gautam Baid. Luck: We can't see it or touch it but we can feel it. We all know it when we experience it. But does it go deeper than this? And if it goes deeper, does it do so in any way which we can harness to our own and others' advantage? Taking us on a fascinating tour through the more popular theories and histories of luck from pseudoscience to paganism, mathematicians to magicians, Max Gunther arrives at a careful set of scientific conclusions as to the true nature of luck and the possibility of managing it. Drawing out the logical truths hidden in some examples of outrageous fortune and some of the seemingly absurd theories of its origins, he presents readers with the concise formulae that make up what he calls the Luck Factor: the five traits that lucky people have in common and shows how anyone can improve their luck.

*On the Riddle of Life* Bohang Chen, 2024-09-12 This book presents a historico-logical study of vitalism. It begins by uncovering previously unknown doctrines of vitalism from the history of science encompassing biological, physical, and social sciences and then subjects these doctrines to a thorough logical analysis. Through this process, the book offers a unified conceptual framework to understand the major doctrines of vitalism in the history of science, ultimately relating vitalism to the question of life. Following the classical methodological approach endorsed by Immanuel Kant, nineteenth-century philosopher/scientists like Ernst Mach and early twentieth-century logical analysts including logical empiricists, British analysts, pragmatists, Husserlian phenomenologists, and neo-Kantians, this work provides unconventional and valuable perspectives on vitalism and the riddle of life, appealing to a broad audience including scientists, historians, and philosophers of science, particularly those from biological backgrounds.
