**Watches, the When Wear How and Why** Samuel Johnson,2017-11-10 A watch is a timepiece ordinarily worn either around the wrist or joined on a chain and conveyed in a pocket Wristwatches are the most widely recognized kind of watch utilized today Observes developed in the seventeenth century from spring fueled timekeepers which showed up in the fifteenth century The principal watches were entirely mechanical As innovation advanced the components utilized to gauge time have at times been supplanted by utilization of quartz vibrations or electronic beats The primary computerized electronic watch was produced in 1970 Horology refers to the craft of making and repairing clocks and watches and those who are involved in the process are called horologists There was a time when watchmakers were also

involved in the process of crafting the parts and creating watches It has changed since the advent of factory made watches Since today s fashion watches are cheaper to replace than to repair horologists now mainly cater to those who own expensive timepieces Many practicing horologists these days use their skills on recent production watches Only a few offer services in fabricating replacement parts it s much more common to get spares from the factory and fit them into the brand of watch they are working on Most watchmakers of this generation specifically in Europe and Switzerland are directly employed by the watchmaking industry They are required to finish a related degree from a technical school After graduating they undergo in house training from the company where they are employed The training and qualifications that you will need as a watchmaker depend on where you intend to work For example Rolex which is a Swiss brand that produces high end watches requires their horologists to finish modern training and get the necessary certificates from a number of known schools They also require their watchmakers to become a member of the American Watchmakers Clockmakers Institute Due to the proliferation of fakes majority of modern Swiss brands implement tight quality control They do not sell watch parts even to the most credible independent horologists Horology is both art and science Begin by perfecting your manual skills learn how to delicately touch the parts of the watch or clock by maneuvering the muscles of your fingers and wrist The Book consists of 6 chapters Chapter 1 discusses about the dress style with watches and watches worn on different occasions and how watches have become a fashion statement Chapter 2 talks about how to choose a watch for men and what you should consider before buying a watch Chapter 3 details the Apple Watch it s components it s usefulness and how it stacks up against other smartwatches like android wear and windows band It also provides information on the different models of apple watches that are available to suit your needs and desires Chapter 4 gives an account of all the benefits of owning an Apple Watch Chapter 5 discusses the Diver watches and what you should consider before buying them Chapter 6 discusses the Bremont watches what they are designed for and which profession makes use of them more efficiently Thank you for purchasing this book it is my sincere hope that it will answer all your questions on watches and dressing
