Roads And Anthropology Ethnography Infrastructures Im Mobility:

Roads and Anthropology Dimitris Dalakoglou, Penelope Harvey, 2016-04-14 Roads and the powerful sense of mobility that they promise carry us back and forth between the sweeping narratives of globalisation and the specific tangible materialities of particular times and places. Indeed despite the fact that roads might by comparison with the sparkling agility of virtual technologies appear to be grounded in twentieth century industrial political economy they could arguably be taken as the paradigmatic material infrastructure of the twenty first century supporting both the information society in the ever increasing circulation of commoditized goods and labour and the extractive economies of developing countries on which the production and reproduction of such goods and labour depends. Roads and Anthropology is the first collection of road ethnographies edited by two pioneers in the anthropological explorations of infrastructures the essays published in this book aim to pave the way for that rising field of anthropological research. This book was published as a special issue of Mobilities.

Roads and Anthropology Taylor & Francis Group, 2020-12-18 Roads and the powerful sense of mobility that they promise carry us back and forth between the sweeping narratives of globalisation and the specific tangible materialities of particular times and places. Indeed despite the fact that roads might by comparison with the sparkling agility of virtual technologies appear to be grounded in twentieth century industrial political economy they could arguably be taken as the paradigmatic material infrastructure of the twenty first century supporting both the information society in the ever increasing circulation of commoditized goods and labour and the extractive economies of developing countries on which the production and reproduction of such goods and labour depends. Roads and Anthropology is the first collection of road ethnographies edited by two pioneers in the anthropological explorations of infrastructures the essays published in the book aim to pave the way for this rising field of anthropological research. This book was published as a special issue of Mobilities. *The Road* Dimitris Dalakoglou, 2017 This book is an ethnographic and historical study of the main Albania-Greece highway. But more than an ethnography on the road it is an anthropology of the road. Highways are part of an explicit cultural material nexus that includes houses, urban architecture and vehicles. Complex socio-political phenomena such as EU border security, nationalist politics, post-Cold War capitalism and financial crises all leave their mark in the concrete. This book explores anew classical anthropological and sociological categories of analysis in direct reference to infrastructure, providing unique insights into the political and cultural processes that took place across Europe after the Cold War. More specifically it sheds light on political and economic relationships in the Balkans during the socialist post-Cold War period focusing especially on Albania, one of the most under-researched countries in the region. Categories such as the house, domestic life, the city, kinship, money, boundaries, nationalism, statecraft, geographic mobility and distance to name but a few seem very different when seen from or on the road.

Infrastructures and Social Complexity Penelope Harvey, Casper Bruun Jensen, Atsuro Morita, 2016-10-04 Contemporary forms of infrastructural development herald alternative futures through their incorporation of digital

technologies mobile capital international politics and the promises and fears of enhanced connectivity In tandem with increasing concerns about climate change and the anthropocene there is further an urgency around contemporary infrastructural provision a concern about its fragility and an awareness that these connective relational systems significantly shape both local and planetary futures in ways that we need to understand more clearly Offering a rich set of empirically detailed and conceptually sophisticated studies of infrastructural systems and experiments present and past contributors to this volume address both the transformative potential of infrastructural systems and their stasis Covering infrastructural figures their ontologies epistemologies classifications and politics and spanning development urban energy environmental and information infrastructures the chapters explore both the promises and failures of infrastructure Tracing the experimental histories of a wide range of infrastructures and documenting their variable outcomes the volume offers a unique set of analytical perspectives on contemporary infrastructural complications These studies bring a systematic empirical and analytical attention to human worlds as they intersect with more than human worlds whether technological or biological

[Audible Infrastructures](#) Kyle Devine,Alexandrine Boudreault-Fournier,2021 Our day to day musical enjoyment seems so simple so easy so automatic Songs instantly emanate from our computers and phones at any time of day The tools for playing and making music such as records and guitars wait for us in stores ready for purchase and use And when we no longer need them we can leave them at the curb where they disappear effortlessly and without a trace These casual engagements often conceal the complex infrastructures that make our musical cultures possible Audible Infrastructures takes readers to the sawmills mineshafts power grids telecoms networks transport systems and junk piles that seem peripheral to musical culture and shows that they are actually pivotal to what music is how it works and why it matters Organized into three parts dedicated to the main phases in the social life and death of musical commodities resources and production circulation and transmission failure and waste this book provides a concerted archaeology of music s media infrastructures As contributors reveal the material environmental realities and political economic conditions of music and listening they open our eyes to the hidden dimensions of how music is made delivered and disposed of In rethinking our responsibilities as musicians and listeners this book calls for nothing less than a reconsideration of how music comes to sound

[Temple Tracks](#) Vineeta Sinha,2023-08-11 The notions of labour mobility and piety have a complex and intertwined relationship Using ethnographic methods and a historical perspective Temple Tracks critically outlines the interlink of railway construction in colonial and post colonial Asia as well as the anthropology of infrastructure and transnational mobilities with religion In Malaysia and Singapore evidence of religion making and railway building from a colonial past is visible in multiple modes and media as memories recollections and traces

A Revelatory Pandemic Roberto E. Barrios,Virginia García-Acosta,2025-12-01 Political leaders and the news media described the public health catastrophe of COVID 19 as a crisis while scholars and public intellectuals portrayed the pandemic as a debacle that would lay bare the

inequities and contradictions of an increasingly neoliberal global political economy and usher in an era of progressive transformative change Bringing the anthropologies of disaster epidemics and crisis into conversation A Revelatory Pandemic subjects these hopeful expectations of post pandemic change to social scientific scrutiny across Latin America and challenges popular and scholarly assumptions about the causes and outcomes of crisis **Highways and Hierarchies** Luke Heslop,Galen Murton,2025-12 This book explores the contemporary proliferation of roads in South Asia and the Tibet Himalaya region showing how new infrastructures simultaneously create fresh connections and reinforce existing inequalities *Roads* Penelope Harvey,Hannah Knox,2015 Sweeping in scope and conceptually ambitious this book tells a story of infrastructure and of global flows of money goods and people **The Cultures of Alternative Mobilities** Taylor & Francis Group,2019-05-31 The Cultures of Alternative Mobilities presents a series of ethnographic studies focusing on the local cultures of mobilities and immobilities emphasizing the everyday sense of contingency and heterogeneity that accompanies them Compensating for the excess of theory and criticism based on the notion of hypermobilities this book sheds light on the nuanced differences and idiosyncrasies of mobility with a view to rediscovering meanings and lifestyles marked by movement and immobility Original empirical and global case studies are presented by an international team of scholars exploring the complex negotiated and contingent nature of the social worlds of movement By avoiding sweeping generalizations on the deeply connected and readily mobile nature of society as a whole this volume sheds light on the diversity of mobility modes in an accessible and interdisciplinary form that will be of key interest to sociologists geographers and scholars of human mobility communication and culture
