The work presents six distinct areas of particular interest from a comparative constitutional perspective first the role of legal scholarship in the work of constitutional courts second structures and processes that contribute to more open or closed styles of constitutional adjudication third pros and cons of collegiality in the work of constitutional courts fourth forms of access by individuals to constitutional justice fifth methods of constitutional interpretation and sixth the relationship between national constitutional adjudication and the transnational context In each of these six areas the volume sets up a new and genuine constitutional dialogue between an Italian scholar presenting a discussion and critical assessment of the specific topic and a non Italian scholar who responds elaborating the issue as seen from constitutional law beyond the Italian system The resulting six such dialogues thus provide a dynamic in depth multidimensional national and transnational comparative examination of these areas in which the Italian style of constitutional adjudication has a distinctive contribution to make to comparative constitutional law in general Fostering a deeper knowledge of the Italian Constitutional Court within the comparative global space and advancing a creative and fruitful methodological approach the book will be fascinating reading
