*South African Road Traffic Signs Manual* J. D. Sampson, South Africa. Department of Transport, Green Light Consortium (South Africa : Firm), 2004    **Linguistic Landscape in the City** Elana Shohamy, Eliezer Ben-Rafael, Monica Barni, 2010-07-29

This book focuses on linguistic landscapes in present day urban settings. In a wide ranging collection of studies of major world cities the authors investigate both the forces that shape linguistic landscape and the impact of the linguistic landscape on the wider social and cultural reality. Not only does the book offer a wealth of case studies and comparisons to complement existing publications on linguistic landscape but the editors aim to investigate the nature of a field of study which is characterised by its interest in ordered disorder. The editors aspire to delve into linguistic landscape beyond its appearance as a jungle of jumbled and irregular items by focusing on the variations in linguistic landscape configurations and recognising that it is but one more field of the shaping of social reality under diverse uncoordinated and possibly incongruent structuration principles    *Geometric Design of Roads Handbook* Keith Wolhuter, 2015-10-05

Language and Politics in Africa is a fine collection of both empirically and theoretically based articles from across the African continent and beyond but all focusing on the twin issues of Language and Politics in post colonial African countries. The authors offer critical perspectives on contemporary theoretical empirical and policy issues related to language and how such issues manifest themselves at the inevitable interface with politics in a number of African countries. Coming at a time when most African countries are still grappling with language policy and planning issues while others are increasingly having to contend with the political outcomes of linguistically and ethnically heterogeneous nation states the present volume is a must read for

scholars and students who are interested on the twin issues of language and politics since it represents one of the first attempts at documenting how language and politics affect each other in a number of African countries The volume is divided into two sections dealing with the politics of language and the language of politics in African countries
