

The background of the entire cover is a dark blue field filled with a complex, interconnected network of thin, glowing blue lines. These lines form a web-like structure, with numerous small, light-colored circular nodes at the intersections and along the lines, suggesting a digital or blockchain network.

**Beyond Traditional Probabilistic Methods in Economics** Vladik Kreinovich, Nguyen Ngoc Thach, Nguyen Duc Trung, Dang Van Thanh, 2018-11-24 This book presents recent research on probabilistic methods in economics from machine learning to statistical analysis Economics is a very important and at the same a very difficult discipline It is not easy to predict how an economy will evolve or to identify the measures needed to make an economy prosper One of the main reasons for this is the high level of uncertainty different difficult to predict events can influence the future economic behavior To make good predictions and reasonable recommendations this uncertainty has to be taken into account In the past most related research results were based on using traditional techniques from probability and statistics such as p value based hypothesis testing These techniques led to numerous successful applications but in the last decades several examples have emerged showing that these techniques often lead to unreliable and inaccurate predictions It is therefore necessary to come up with new techniques for processing the corresponding uncertainty that go beyond the traditional probabilistic techniques

This book focuses on such techniques their economic applications and the remaining challenges presenting both related theoretical developments and their practical applications      The Age of Cryptocurrency Paul Vigna,Michael J.
