Contemporary Composition Studies Edith Babin,Kimberly Harrison,1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field s development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person s contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field **Studies in Child Welfare** University of Iowa,1969 Internationale Zeitschrift für

Experimentale Pädagogik ,1994 *Jewish Education* Ari Y Kelman,2024-05-17 Most writing about Jewish education has been preoccupied with two questions What ought to be taught And what is the best way to teach it Ari Y Kelman upends these conventional approaches by asking a different question How do people learn to engage in Jewish life This book by centering learning provides an innovative way of approaching the questions that are central to Jewish education specifically and to religious education more generally At the heart of Jewish Education is an innovative alphabetical primer of Jewish educational values qualities frameworks catalysts and technologies which explore the historical ways in which Jewish communities have produced and transmitted knowledge The book examines the tension between Jewish education and Jewish Studies to argue that shifting the locus of inquiry from what people ought to know to how do people learn can provide an understanding of Jewish education that both draws on historical precedent and points to the future of Jewish knowledge
