**Handbook of Research on the Interplay Between Service Quality and Customer Delight** Sarma, Sarmistha, Gupta, Neha, 2023-01-31 Research in the field of service quality and consumer behavior has developed in many dimensions in the past decade. A number of models have been developed to determine the factors leading to satisfaction; however, within the past few years, scholars have proved that satisfaction is not sufficient to leave a strong mark in the minds of the customers. Service quality and customer delight have been the buzzwords in the business world in recent times as scholars have proven that customer delight is the key to customer retention. The Handbook of Research on the Interplay Between Service Quality and Customer Delight considers how companies around the world in a cross-cultural environment are dealing with service quality and customer delight and proposes a global outlook on the current trends, tactics, and opportunities. Covering key topics such as buyer funnels, consumer dissonance, and digital solutions, this reference work is ideal for business owners, managers, industry professionals, researchers, scholars, practitioners, academicians, instructors, and students.

**The Digital Twin** Noel Crespi, Adam T. Drobot, Roberto Minerva, 2023-06-02 The Digital Twin book is about harnessing the power of technology, business practices, and the digital infrastructure to make revolutionary improvements for the benefit of society. Ninety experts from around the world contributed to summarize four decades of digital advances and successes and to define the Digital Twin's potential for the decades ahead. The book describes how Digital Twins will play a key role in specific applications and across important sectors of the global economy, making it a must-read for executives, policymakers, technical leaders, researchers, and students alike. The book consists of thirty-eight chapters that cover Digital Twin concepts, supporting technologies, practices, and specific implementation strategies for various production and service sectors. Digital Twins are about creating faster, less expensive, and error-free manufacturing products, processes, and services. This includes engineering of systems for energy, communications, construction, transportation, and food processing. It also covers solutions for making human existence better and more enjoyable through the life sciences, smart cities, and artistic creations. The Digital Twin's functionality addresses the entire lifecycle of products and services. Importantly, the book describes the journey required for businesses and public organizations to embrace Digital Twins as part of their tool kit. The Digital Twin is the ideal starting point for teaching and research in all application domains.
