**The Portfolio Organizer** Carol Rolheiser, Barbara Bower, 2000-06-15 The Portfolio Organizer stands out as a superb contribution to the vital field of accountability for learning. This book is distinguished by the presence and integration of a conceptual framework and a superb array of practical examples. Nearly every key issue is anticipated and addressed in this accessible and clear treatment of a complex topic. The reason that this book is so good is that the authors have been immersed in pioneering work on portfolios for a decade. They have developed their ideas through work with their own students and through a wide range of research and evaluation projects including new initiatives involving elementary and secondary school students, initial preparation of teachers and continuous professional development of teachers and administrators. They have learned by grappling with the complex issues of introducing evaluation that simultaneously serves improvement and accountability goals. The result is a great practical book that can help educators develop their understanding and use of portfolios as a route to reform. This book provides educators with a flexible framework to guide decision making for effective and efficient use of portfolios in classrooms and schools. It is designed to assist classroom teachers, administrators, staff developers and university professors in identifying, organizing and acting upon the many challenges and possibilities inherent in portfolio implementation. Specifically, The Portfolio Organizer targets the major categories of decision making and assists teachers in making decisions about effective portfolio implementation in classrooms. In addition, the book addresses professional portfolios and can be used by educators to develop and maintain their own portfolios. ### Social Protection and Informal Workers in Sub-Saharan Africa

Lone Riisgaard,Winnie V. Mitullah,Nina Torm,2021-11-24 The promotion of social protection in Sub Saharan Africa happens in a context where informal labour markets constitute the norm and where most workers live uncertain livelihoods with very limited access to official social protection The dominant social protection agenda and the associated literature come with an almost exclusive focus on donor and state programmes even if their coverage is limited to small parts of the populations and in no way stands measure to the needs In these circumstances people depend on other means of protection and cushioning against risks and vulnerabilities including different forms of collective self organizing providing alternative forms of social protection These informal bottom up forms of social protection are at a nascent stage of social protection discussions and little is known about the extent or models of these informal mechanisms This book seeks to fill this gap by focusing on three important sectors of informal work namely transport construction and micro trade in Kenya and Tanzania It explores how the global social protection agenda interacts with informal contexts and how it fits with the actual realities of the informal workers Consequently the authors examine and compare the social protection models conceptualized and implemented from above by the public authorities in Tanzania and Kenya with social protection mechanisms from below by the informal workers own
