[Wittgensteinian Way with Paradoxes](#) Rupert Read, 2012-10-25 A Wittgensteinian Way with Paradoxes examines how some of the classic philosophical paradoxes that have so puzzled philosophers over the centuries can be dissolved Read argues that paradoxes such as the Sorites Russell s Paradox and the paradoxes of time travel do not in fact need to be solved Rather using a resolute Wittgensteinian therapeutic method the book explores how virtually all apparent philosophical paradoxes can be diagnosed and dissolved through examining their conditions of arising to loosen their grip and therapeutically liberate those philosophers suffering from them including oneself The book contrasts such paradoxes with real lived paradoxes paradoxes that are genuinely experienced outside of the philosopher s study in everyday life Thus Read explores instances of lived paradox such as paradoxes of self hatred and of denial of other humans humanity and the harm they can cause psychically morally or politically These lived paradoxes he argues sometimes cannot be dissolved using a Wittgensteinian

treatment Moreover in some cases they do not need to be for some such as the paradoxical practices of Zen Buddhism and indeed of Wittgenstein himself can in fact be beneficial The book shows how once philosophers paradoxes have been exorcized real lived paradoxes can be given their due **Paradoxes of Time Travel** Ryan Wasserman,2017-12-01 Ryan Wasserman presents a wide ranging exploration of puzzles raised by the possibility of time travel including the grandfather paradox the bootstrapping paradox and the twin paradox of special relativity He draws out their implications for our understanding of time tense freedom fatalism causation counterfactuals laws of nature persistence change and mereology The Paradoxes of Time Travel is written in an accessible style and filled with entertaining examples from physics science fiction and popular culture **Time of Nature and the Nature of Time** Christophe Bouton,Philippe Huneman,2017-05-30

This volume addresses the question of time from the perspective of the time of nature Its aim is to provide some insights about the nature of time on the basis of the different uses of the concept of time in natural sciences Presenting a dialogue between philosophy and science it features a collection of papers that investigate the representation modeling and understanding of time as they appear in physics biology geology and paleontology It asks questions such as whether or not the notions of time in the various sciences are reducible to the same physical time what status should be given to timescale differences or what are the specific epistemic issues raised by past facts in natural sciences The book first explores the experience of time and its relation to time in nature in a set of chapters that bring together what human experience and physics enable metaphysicians logicians and scientists to say about time Next it studies time in physics including some puzzling paradoxes about time raised by the theory of relativity and quantum mechanics The volume then goes on to examine the distinctive problems and conceptions of time in the life sciences It explores the concept of deep time in paleontology and geology time in the epistemology of evolutionary biology and time in developmental biology Each scientific discipline features a specific approach to time and uses distinctive methodologies for implementing time in its models This volume seeks to define a common language to conceive of the distinct ways different scientific disciplines view time In the process it offers a new approach to the issue of time that will appeal to a wide range of readers philosophers and historians of science metaphysicians and natural scientists be they scholars advanced students or readers from an educated general audience
