

# Model Identification

This workshop manual applies to the products listed in Service Bulletin 04-2-67 version 1 dated 08-2007. The unit that you are servicing may be identified from the product model identification plates and/or decals that are placed in various locations to identify Volvo Penta engines, transmissions, transom shields, and drives.

All sterndrive system components must be matched for either single or dual engine installations. Failure to properly match engine, transmission, transom shield, and drive unit will result in poor boat performance, and risk damage to engine and drive because of incorrect drive gear ratio.

## 4.3, 5.0, and 5.7 GL, GXI, OSi, OSXi models

On 3.0L engines, the model identification plate is located on the side of the valve cover.

## 8.1 GL, GXI, OSi models

## All GL models

For all other engines, the model identification plate or decal is located either on the port side of the engine cover and/or next to the flywheel housing.
