Cultural Sociology of Mental Illness Andrew Scull, 2013-12-20

Cultural Sociology of Mental Illness: An A to Z Guide looks at recent reports that suggest an astonishing rise in mental illness and considers such questions as: Are there truly more mentally ill people now or are there just more people being diagnosed and treated? What are the roles of economics and the pharmacological industry in this controversy? At the core of what is going on with mental illness in America and around the world, the editors suggest is cultural sociology. How differing cultures treat mental illness and in turn how mental health patients are affected by the culture. In this illuminating multidisciplinary reference, expert scholars explore the culture of mental illness from the non clinical perspectives of sociology, history, psychology, epidemiology, economics, public health, policy, and finally the mental health patients themselves. Key themes include Cultural Comparisons of Mental Health Disorders, Cultural Sociology of Mental Illness Around the World, Economics, Epidemiology, Mental Health Practitioners, Non Drug Treatments, Patient the Psychiatry and Psychology, Psychiatry and Space, Psychopharmacology, Public Policy, Social History and Sociology. Transforming Mental Health Services Howard H. Goldman, Jeffrey A. Buck, Kenneth S. Thompson, 2009-06-26 This compendium of 17 articles addresses the goals set forth by the President's New Freedom Commission on Mental Health in its 2003 report *Achieving the Promise: Transforming Mental Health Care in America* The report represents the first time since the Carter Administration that such a high level group evaluated U S mental health care The report painted a dismal picture of the nation's mental health system saying the system was so broken that it was beyond simple repair The Commission said that current services focused on managing disabilities rather than helping patients achieve a meaningful life in their communities It also stated that mental health service providers ignored the preferences of consumers and their families The articles in *Transforming Mental Health Services: Implementing the Federal Agenda for Change* originally published between 2006 and 2009 in *Psychiatric Services* journal of the American Psychiatric Association offer recommendations to assist adults with serious mental illness and children with serious emotional disturbances They include a series of reforms in which the emphasis is on recovery as an achievable goal and the need for a person centered orientation in service delivery There is also discussion of the reasons many service providers resist using a recovery orientation and how this can be remedied *Transforming Mental Health Services: Implementing the Federal Agenda for Change* consists of updates of papers written by the Commission's subcommittees addressing issues fundamental to those living with mental illness It is organized into four sections The first focuses on the interface between mental health and general health and on employment housing and Medicaid financing The second continues addressing financing and Medicaid as well as issues related to school mental health recovery transformation of data systems and acceleration of research The third includes reports from four states with transformation initiatives designed to ensure that consumers have a strong voice in the development of recovery oriented services The final section describes progress five years after the President's Commission Report and concludes with a proposal by the current director of the Center for Mental Health Services for a public health model of mental health care for the 21st century This compilation of well researched and well written articles offers an excellent resource for frontline care providers facility administrators and advocates It serves as an equally valuable resource for state policy makers who wish to present a convincing case that change is happening and that the recommendations can be translated into effective policies Although consumers and their families will receive support for their perception that service providers ignore their needs they will also be encouraged that change for the better is coming to the U S mental health care system
