

Chapter 13: Caring for the person with mental health needs in the community. In. Community and public health nursing. Eds Sines et al (2013), 5th Edition. Wiley Blackwell, UK

Peter Thomas Sandy and Margaret Rioga

Abstract

Community mental health nurses are part of community mental health teams that offer care and support to service users with mental distress. They are generally described as “gate keepers” because they ensure service users’ timely assessment and access to appropriate therapeutic services. Because service users’ needs are unique and constantly changing, community mental health nurses are required to reconceptualise their approaches to care. One approach that has gained popularity in mental health services because it advocates individualised care, collaborative and partnership working is recovery. This chapter uses a recovery framework to discuss the roles of community mental health nurses from a contextual and practical perspective. It uses a case study of a service user with mental distress to illustrate this. To increase understanding of the service user’s recovery journey, key principles of a recovery approach to community mental health nursing are included in the chapter

The Interactive World of Severe Mental Illness Diana J. Semmelhack, Larry Ende, Arthur Freeman, Clive Hazell, Colleen L. Barron, Garry L. Treft, 2015-07-03 In our society medication is often seen as the treatment for severe mental illness with psychotherapy a secondary treatment However quality social interaction may be as important for the recovery of those with severe mental illness as are treatments This volume makes this point while describing the emotionally moving lives of eight individuals with severe mental illness as they exist in the U S mental health system Offering social and psychological insight into their experiences these stories demonstrate how patients can create meaningful lives in the face of great difficulties Based on in depth interviews with clients with severe mental illness this volume explores which structures of interaction encourage growth for people with severe mental illness and which trigger psychological damage It considers the clients relationships with friends family peers spouses lovers co workers mental health professionals institutions the community and the society as a whole It focuses specifically on how structures of social interaction can promote or harm psychological growth and how interaction dynamics affect the psychological well being of individuals with severe mental illness

Evidence-based Practices in Mental Health Care American Psychiatric Association, 2003 As the first attempt to synthesize the movement toward widespread implementation of evidence based mental health practices this groundbreaking collection articulates the basic tenets of evidence based medicine and shows how practices proven effective by clinical services research could improve the lives of many people Intended to stimulate much needed public discussion these remarkable contributions cover both general issues such as Implementing practices in routine mental health settings including strategies for disseminating evidence based practices to staff members Ensuring that efforts to implement such practices are informed by the knowledge and experience of administrators clinicians patients and advocates Integrating evidence based practices with the recovery model and focusing on guidelines and algorithms for pharmacologic treatment of people with severe mental illness Identifying the policy implications of the movement particularly in public sector settings and describing eight courses of action for addressing the gap between science and practice and specific practices such as Describing critical components of practices for which substantial evidence exists such as supported employment dual diagnosis services and assertive community treatment Developing an evidence base for particular populations such as children and adolescents and geriatric patients and for clinical subgroups such as patients with severe mental illness and posttraumatic stress disorder and implementing a range of practices for each population Debate in public forums is critical to

explaining the benefits of evidence based care and allaying the fears of patients practitioners administrators policy makers and vested interest groups that evidence based care excludes them from the decision making process Patients need to know that their individual characteristics preferences and autonomy are highly valued and won't be discounted by rigid adherence to the particular treatments Practitioners need to know about the credibility of the evidence base and about new techniques and responsibilities and to understand that their favorite practices won't necessarily be excluded during initial attempts to implement evidence based practices Administrators and policy makers need to know about financing organizing implementing and sustaining new practices Finally vested interest groups need to know that the introduction of evidence based practices doesn't mean that what they do now is ineffective This unique and densely informative volume will be welcomed by mental health care professionals and by lawmakers planners administrators and others who are charged with the responsibility of providing effective care to vulnerable populations The American Journal of Nursing ,1926 **The American Journal of Psychiatry** ,1972 *Mental Health User Narratives* Bruce M.Z.
