

Patient Care Policy & Procedure Manual

POINT OF CARE INR MANAGEMENT

POLICY

The Family Health Team is committed to ensuring that all patients requiring anticoagulation therapy are managed in a timely, cost effective, and therapeutically appropriate manner that is accessible and acceptable to both patients and physicians.

Target therapeutic ranges are established using best practice guidelines.

Only Nurse Clinicians and Lab Technicians trained in the use of the Point of Care INR testing device are authorized to administer these tests.

The Clinical Pharmacist interprets and adjusts warfarin dosages as per medical directive.

PROCEDURE

1. Patient presents to the clinic as per scheduled time.
2. Lab Technician administers Point of Care test, records results on communication tool and passes tool to appointed Nurse Clinician.
3. If INR is between 2.2-2.8 for target therapeutic range of 2-3 or 2.7-3.3 for target therapeutic range of 2.5-3.5, the Nurse Clinician completes a brief history of client status, medication changes and adherence to treatment since last test date. The Nurse Clinician provides the patient with a card showing the date of the next INR measurement and documents in the EMR.
4. If INR is outside the parameters, the Nurse Clinician forwards the patient to the Clinical Pharmacist.
5. The Clinical Pharmacist assesses the patient and adjusts the warfarin dosage as per the approved treatment algorithm.
6. If a new prescription is needed, the Clinical Pharmacist generates the script for the responsible physician to sign and gives it to the patient. The Clinical Pharmacist documents in the EMR.
7. The Clinical Pharmacist provides the patient with a card showing the time for the next INR measurement.
8. The Clinical Pharmacist reviews INR report log at end of clinic and reports to physician as necessary.

Food Service Manual for Health Care Institutions Ruby Parker Puckett, American Society for Healthcare Food Service Administrators, 2004-11-08 Food Service Manual for Health Care Institutions offers a comprehensive review of the management and operation of health care food service departments This third edition of the book which has become the standard in the field of institutional and health care food service includes the most current data on the successful management of daily operations and includes information on a wide variety of topics such as leadership quality control human resource management communications and financial control and management This new edition also contains information on the practical operation of the food service department that has been greatly expanded and updated to help institutions better meet the needs of the customer and comply with the regulatory agencies standards *A review of hospital billing and collections practices* United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Oversight and Investigations, 2004 **Nursing Administration Handbook** Howard S. Rowland, Beatrice L. Rowland, 1997 This handbook presents the concepts of the administrative process as applied to the administration of healthcare delivery The purpose of the book is to provide a roadmap for nurse administrators to use as they negotiate their way through an increasingly complex and evolving field It is a text and a hands on reference Texts such as this are needed and authors objectives are met The book is a text for students and handbook for nurse executives My judgment is that it is for graduate students and beginning managers for the most part The authors are credible given it is their fourth edition of the book The illustrations include tables and examples of management tools that serve to highlight important points in the text References are mostly from the early to mid 1990s with some of the older more historical references The table of contents is thorough and easy to use This book covers thoroughly the concepts incorporated in the nursing administration domain The framework for organizing the chapters is an acceptable framework but not one I prefer

The book is useful and the tables and examples are helpful I would recommend its use as a basic reference for graduate students in nursing administration **Handbook of Institutional Pharmacy Practice** Thomas R. Brown,2006 This comprehensive text provides fundamental information on a broad spectrum of essential topics in health system pharmacy practice From an overview of health delivery systems and hospital pharmacy through various practice settings such as home care long term care hospice and palliative care ambulatory care and managed care this text focuses on various elements important to health system pharmacies The Handbook of Institutional Pharmacy Practice is the first step in developing a career in pharmacy and provides opportunities for study in career enhancement New chapters included in the fourth edition Integrity of the Drug Supply Overview of the History of Hospital Pharmacy in the United States Interprofessional Teams Collaborative Practice Models Development Implementation and Monitoring Therapeutic Plans and Evidence Based Medicine

Clinical Engineering Handbook Joseph F. Dyro,2004-08-27 As the biomedical engineering field expands throughout the world clinical engineers play an ever more important role as the translator between the worlds of the medical engineering and business professionals They influence procedure and policy at research facilities universities and private and government agencies including the Food and Drug Administration and the World Health Organization Clinical engineers were key players in calming the hysteria over electrical safety in the 1970s and Y2K at the turn of the century and continue to work for medical safety This title brings together all the important aspects of Clinical Engineering It provides the reader with prospects for the future of clinical engineering as well as guidelines and standards for best practice around the world
