**Pattern Classification** Richard O. Duda, Peter E. Hart, David G. Stork, 2012-11-09 The first edition published in 1973 has become a classic reference in the field. Now with the second edition, readers will find information on key new topics such as neural networks and statistical pattern recognition, the theory of machine learning, and the theory of invariances. Also included are worked examples, comparisons between different methods, extensive graphics, expanded exercises, and computer project topics. An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department.

**Pattern Classification 2nd Edition with Computer Manual 2nd Edition Set** Richard O. Duda, 2004-06-04 The first edition published in 1973 has become a classic reference in the field. Now with the second edition, readers will find information on key new topics such as neural networks and statistical pattern recognition, the theory of machine learning, and the theory of invariances. An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department.

**New Solutions for an Old Challenge** Ronny Merkel, 2014 In criminal investigations, latent fingerprints are often considered as reliable means of identifying suspects. However, the evidential value of a print is strongly dependent on the knowledge of its age, the time which has passed since deposition. Suspects might admit their previous presence at a crime scene but often claim to have been there prior to or after the crime. Especially in regard to public or highly frequented crime scenes, prints might lose their evidential value in this case, potentially leading to dropped charges. Despite its high relevance, the challenge of estimating a latent print's age could not be adequately addressed for 80 years. In this thesis, non-invasive high-resolution capturing devices are for the first time applied to the age estimation challenge, replacing classical physical or chemical print development techniques. They allow to capture a single print in regular time intervals and to systematically study its degradation behavior. Introducing automated processing methods in the form of a digital pipeline, including preprocessing, feature extraction, and age estimation techniques, objective age estimates are presented for the first time in this field. Maximum classification performances of different capturing devices between 76% and 86% are achieved for two-class problems. Furthermore, a qualitative influence model on the aging speed of latent prints is designed, forming a prerequisite for future studies.

**Biometric Solutions** David D. Zhang, 2012-12-06 *Biometric Solutions for Authentication in an E World* provides a collection of sixteen chapters containing tutorial articles and new material in a unified manner. This includes the basic concepts, theories, and characteristic features of integrating, formulating, and different facets of biometric solutions for authentication with recent developments and significant applications in an E-world. This book provides the reader with a basic concept of biometrics, an in-depth discussion exploring biometric technologies in various applications in an E-world. It also includes a detailed description of typical biometric-based security systems and up-to-date coverage of how these issues are developed. Experts from all over the world

demonstrate the various ways this integration can be made to efficiently design methodologies algorithms architectures and implementations for biometric based applications in an E world *Bioinformatics and Computational Biology Solutions Using R and Bioconductor* Robert Gentleman,Vincent Carey,Wolfgang Huber,Rafael Irizarry,Sandrine Dudoit,2005-12-29 Bioconductor is a widely used open source and open development software project for the analysis and comprehension of data arising from high throughput experimentation in genomics and molecular biology Bioconductor is rooted in the open source statistical computing environment R This volume s coverage is broad and ranges across most of the key capabilities of the Bioconductor project including importation and preprocessing of high throughput data from microarray proteomic and flow cytometry platforms Curation and delivery of biological metadata for use in statistical modeling and interpretation Statistical analysis of high throughput data including machine learning and visualization Modeling and visualization of graphs and networks The developers of the software who are in many cases leading academic researchers jointly authored chapters All methods are illustrated with publicly available data and a major section of the book is devoted to exposition of fully worked case studies This book is more than a static collection of descriptive text figures and code examples that were run by the authors to produce the text it is a dynamic document Code underlying all of the computations that are shown is made available on a companion website and readers can reproduce every number figure and table on their own computers

**Knowledge, Information and Creativity Support Systems: Recent Trends, Advances and Solutions** Andrzej M.J. Skulimowski,Janusz Kacprzyk,2016-02-25 This volume contains some carefully selected papers presented at the 8th International Conference on Knowledge Information and Creativity Support Systems KICCS 2013 which was held in Krak w and Wieliczka Poland in November 2013 In most cases the papers are extended versions with newer results added representing virtually all topics covered by the conference The KICCS 2013 focus theme Looking into the Future of Creativity and Decision Support Systems clearly indicates that the growing complexity calls for some deeper and insightful discussions about the future but obviously complemented with an exposition of modern present developments that have proven their power and usefulness Following this theme the list of topics presented in this volume include some future oriented fields of research such as anticipatory networks and systems foresight support systems relevant newly emerging applications exemplified by autonomous creative systems Special attention was also given to cognitive and collaborative aspects of creativity **Advanced Solutions in Power Systems** Mircea Eremia,Chen-Ching Liu,Abdel-Aty Edris,2016-08-31 Provides insight on both classical means and new trends in the application of power electronic and artificial intelligence techniques in power system operation and control This book presents advanced solutions for power system controllability improvement transmission capability enhancement and operation planning The book is organized into three parts The first part describes the CSC HVDC and VSC HVDC technologies the second part presents the FACTS devices and the third part refers to the artificial intelligence techniques All technologies and tools approached in this book are essential for power system

development to comply with the smart grid requirements Discusses detailed operating principles and diagrams theory of modeling control strategies and physical installations around the world of HVDC and FACTS systems Covers a wide range of Artificial Intelligence techniques that are successfully applied for many power system problems from planning and monitoring to operation and control Each chapter is carefully edited with drawings and illustrations that helps the reader to easily understand the principles of operation or application Advanced Solutions in Power Systems HVDC FACTS and Artificial Intelligence is written for graduate students researchers in transmission and distribution networks and power system operation This book also serves as a reference for professional software developers and practicing engineers **Advancing**

**neural network-based intelligent algorithms in robotics: challenges, solutions, and future perspectives** Long Jin,Xin Ma,2025-09-15 The integration of neural network based intelligent algorithms with robotics has revolutionized the field of robotics in recent years Inspired by the human brain neural networks have shown great potential in enabling robots to learn from data make intelligent decisions and perform complex tasks These algorithms have been applied in various areas of robotics including perception control planning and learning More precisely convolutional neural networks CNNs have significantly improved robot vision capabilities while recurrent neural networks RNNs have enhanced sequential data processing for tasks such as speech recognition and natural language understanding Deep reinforcement learning algorithms have enabled robots to learn optimal control policies through interaction with their environment Additionally re current neural networks have contributed to the stability control performance improvement and redundancy resolution of robots The continuous advancements in neural network based algorithms in robotics holds great promise for the future of intelligent robotic systems Rising Threats in Expert Applications and Solutions Vijay Singh Rathore,Subhash Chander Sharma,Joao

Manuel R.S. Tavares,Catarina Moreira,B. Surendiran,2022-07-03 The book presents high quality peer reviewed papers from the FICR International Conference on Rising Threats in Expert Applications and Solutions 2022 organized by IIS Deemed to be University Jaipur Rajasthan India during January 7 8 2022 The volume is a collection of innovative ideas from researchers scientists academicians industry professionals and students The book covers a variety of topics such as expert applications and artificial intelligence machine learning advance web technologies such as IoT big data cloud computing in expert applications information and cyber security threats and solutions multimedia applications in forensics security and intelligence advancements in app development management practices for expert applications and social and ethical aspects in expert applications through applied sciences *Evolving Application Domains of Data Warehousing and Mining: Trends and Solutions* Furtado, Pedro Nuno San-Banto,2009-09-30 This book provides insight into the latest findings concerning data

warehousing data mining and their applications in everyday human activities Provided by publisher **Remote Sensing Digital Image Analysis** John A. Richards,2022-01-06 Remote Sensing Digital Image Analysis provides a comprehensive treatment of the methods used for the processing and interpretation of remotely sensed image data Over the past decade

there have been continuing and significant developments in the algorithms used for the analysis of remote sensing imagery even though many of the fundamentals have substantially remained the same As with its predecessors this new edition again presents material that has retained value but also includes newer techniques covered from the perspective of operational remote sensing The book is designed as a teaching text for the senior undergraduate and postgraduate student and as a fundamental treatment for those engaged in research using digital image analysis in remote sensing The presentation level is for the mathematical non specialist Since the very great number of operational users of remote sensing come from the earth sciences communities the text is pitched at a level commensurate with their background The chapters progress logically through means for the acquisition of remote sensing images techniques by which they can be corrected and methods for their interpretation The prime focus is on applications of the methods so that worked examples are included and a set of problems conclude each chapter
