There's a Writer in Our House! Strategies for Supporting and Encouraging Young Writers and Readers at Home Ann P. Kaganoff, 2024-04-11 There's a Writer in Our House is an invitation to parents of children in first grade through fifth grade interested in actively participating in their children's early literacy learning from the very first steps. Founded upon well-researched literacy instructional methods that have been informed by the author's clinical perspective as well as her years of experience with many kinds of learners, this book provides a valuable understanding of how both writing and reading contribute to child development in multiple areas. Chapters provide background concepts regarding grammar and specific critical thinking skills in both writing and reading as well as customizable child-centered activities used to practice and build writing and reading comprehension skills. You will learn how to advance and encourage your child's learning and communication skills by highlighting important literacy areas such as vocabulary development, background knowledge, and critical thinking. You will also learn to recognize and track the significant developmental achievements of your child as you proceed from the early to the more complex At Home activities as well as receive strategies for how to respond and give feedback in specific situations such as when a child writes something that makes sense to the child but not to the parent, how to offer feedback that identifies and labels a child's strengths, and how to collaborate effectively with a child who is just developing new interests or a new willingness to try something that previously seemed hard. Practical, accessible, and most importantly, fun, this book is a must-read for all parents regardless of background seeking to support their children's ongoing literacy development confidently and effectively.

Investigating Classroom Interaction, 2009-01-01 This book adds a new perspective to existing research methodology literature on analyzing social interactions in the classroom. Not only does this book introduce multiple research methodologies for analyzing classroom interactions, but it also demonstrates these methodologies at work in different empirical research studies. The authors of this book are all internationally well-recognized for their research work on the social life of classrooms, and now for the first time they provide concrete accounts of the ways in which the theories and methodologies they have chosen to guide their research work function in action. These black boxes or tacit knowledge of conducting different types of analyses on classroom interaction have seldom been opened up in such a concrete way in the existing research literature. This book is an edited collection of papers introducing strands of research on classroom interaction whose logic of inquiry illuminates different approaches, analyses, and interpretations of social interactions and discourses in contemporary classroom settings. The methodological approaches discussed draw on studies of language and discourse, ethnography, as well as on sociological, psychological, and domain-specific analyses. In recognizing the complexity and challenges in mapping out the complex research territory focusing on classroom interactions, the prime goal of the book is to build a complimentary context for discussion of the ways in which different approaches to classroom interaction are realized and how they produce different analyses because of their purpose, conceptual framework, and methodological choice.

The illumination of diverse approaches to classroom interaction and discourse is believed to demonstrate the potential and challenges each strand of research is likely to bring towards understanding the psychological social and cultural life of the classroom and how these mediate the situated practice of teaching and learning in today's schooling This book is targeted towards researchers and graduate students working within the field of social sciences education and psychology It also makes an excellent text for courses in research methodology education and related fields

Collaborative Creativity

Dorothy Miell, Karen Littleton, 2004. The contributors to this volume adopt a socio-cultural approach to understanding collaborative creativity across a wide range of domains such as music composition, business school-based creative writing, and art, fashion design, theatre production, and web-based academic collaborations. Central to the socio-cultural approach to creativity is the recognition that it is a fundamentally social process. It thus follows that if we are to understand and characterize human creativity, we need to examine the cultural, institutional, and interpersonal contexts that support and sustain such activity. We also need to understand how cultural tools and technologies resource collaborative creativity. The volume offers a distinctive and valuable contribution to this growing field of scholarship by presenting new empirical findings, reviews, and critiques of existing literature together with suggestions for how this field should develop.
