O'Connell, Martha Staeheli Lawless, 2008-10-02 This book takes a lofty vision of recovery and of a life in the community for every adult with a serious mental illness promised by the U.S. President's 2003 New Freedom Commission on Mental Health and shows the reader what is entailed in making this vision a reality. Beginning with the historical context of the recovery movement and its recent emergence on the center stage of mental health policy around the world the authors then clarify various definitions of mental health recovery and address the most common misconceptions of recovery held by skeptical practitioners and worried families. With this framework in place the authors suggest fundamental principles for recovery oriented care a set of concrete practice guidelines developed in and for the field a recovery guide model of practice as an alternative to clinical case management and tools to self assess the recovery orientation of practices and practitioners. In doing so this volume represents the first book to go beyond the rhetoric of recovery to its implementation in everyday practice. Much of this work was developed with the State of Connecticut's Department of Mental Health and Addiction Services helping the state to win a 1 ranking in the recent NAMI report card on state mental health authorities. Since initial development of these principles guidelines and tools in Connecticut the authors have become increasingly involved in refining and tailoring this approach for other systems of care around the globe as more and more governments, ministry leaders, system managers, practitioners and people with serious mental illnesses and their families embrace the need to transform mental health services to promote recovery and community inclusion. If you've wondered what all of the recent to do has been about with the notion of recovery in mental health this book explains it. In addition it gives you an insider's view of the challenges and strategies involved in transforming to recovery and a road map to follow on the first few steps down this exciting promising and perhaps long overdue path *A National Framework for Recovery-Oriented Mental Health Services* Department of Health and Ageing Staff, 2013

**Accountability in Crisis: Evaluating Results-Based Management implementation in Zimbabwe's Not-for-Profit Sector During COVID-19 Pandemic** Wellington Mushayi, 2025-07-08 Doctoral Thesis Dissertation from the year 2025 in the subject Business economics Business Management Corporate Governance grade Pass University of Zambia Graduate School of Business course Doctoral Dissertation GSB9050 language English abstract Results Based Management (RBM) aims to enhance accountability, transparency and effectiveness in the allocation and utilization of resources. In the not for profit sector particularly among non governmental organizations (NGOs) RBM has been pivotal in ensuring interventions are aligned with organizational goals and community needs thereby maximizing impact. COVID 19 pandemic has significantly impacted the not for profit sector in Zimbabwe by causing unprecedented challenges such as restrictions on movement

supply chain disruptions and economic downturns. These challenges have necessitated swift and adaptive responses from NGOs which play a critical role in providing essential services and support to vulnerable populations. This study examines the impact of the pandemic on the implementation of RBM within the not for profit sector in Zimbabwe. The study focuses on not for profit organizations (NPOs) whose importance in a nation's development cannot be understated. A concurrent mixed methods approach was employed using a survey of 190 NPOs, in depth interviews and focus group discussions with NPOs staff. Quantitative data were analyzed using descriptive statistics and inferential statistics with Chi square test of association while thematic analysis was done for qualitative data. The findings reveal essential influences of COVID 19 on NPOs ability to implement RBM identifying key factors influencing effectiveness during the pandemic including organizational flexibility, donor support and communication strategies. Additionally, it highlights the need for strengthened capacities such as data analysis skills and potentially adjusted incentive structures to support effective RBM. The study underscores the inherent challenges of RBM during a crisis including uncertainty, competing priorities and the potential focus on short term relief. This research contributes to a greater understanding of the challenges and opportunities for NPOs implementing RBM during a global crisis. The findings offer valuable insights for NPOs, donors and policymakers to strengthen RBM practices and ensure continued effectiveness in achieving impactful results.
