 screen tablets have greatly expanded the technology accessible to preschoolers toddlers and even infants given that they do
 not require the fine motor skills required for using traditional computers Many parents and educators wish to make evidence
 based decisions regarding young children s technology use yet technological advancements continue to occur faster than
 researchers can keep up with Accordingly despite touch screen tablets entering society more than 5 years ago we are in the
 infancy of research concerning interactive media and children The topic has gained traction in the past couple of years For
 example theoretical papers have discussed how interactive media activities differ from physical toys and passive media
