Objective: Curriculum development and reviews are of paramount importance for academic programs curriculum management. Medical curricula need proper construction and frequent updates to suits learning outcomes considering their integrative nature and rapid scientific advancement. Curriculum alignment and mapping are fundamental for proper integration and planning of medical curriculum. This process is beneficial in detecting gaps and redundancies, and ensuring proper instruction, integration, and transparency. However, there is a paucity in the literature of a practical guidance to such process. Hence, this manuscript provides a practical guidance that was adopted in our institutes.

Methods: A detailed description of twelve step-by-step guidance to curriculum alignment and mapping was provided. The process needed for each step and the flow chart of work was detailed.

Results: This guide was developed and implemented successfully. Among many benefits encountered, many gaps in the contents, learning outcomes and assessment methods were detected and rectified. Additionally, better curriculum integration has been achieved. The current mapping will make any future curriculum reviews easier.

Conclusion: This guide could be utilized by newly developed and existing programs for curriculum alignment and mapping. It fills a gap in academic literature through stepwise workflow which has been tested and implemented.

Introduction

A curriculum defines the intended knowledge skills and learning outcomes expected by students.¹ A curriculum is designed based on learning and instruction principles and requires a composite of different educational strategies, course content, learning outcomes, educational experiences, assessment, and a suitable educational environment considering individual students' learning styles and programs of work.^{1,2} To have a constructive curriculum, harmonization is a mainstay between declared or planned curriculum, operational curriculum (taught or learned), and experienced curriculum.^{1,3} This requires proper alignment between the intended learning outcomes (curricular intent) expected in the declared curriculum and other instructional components, namely teaching methods, within-class teaching activities, and assessment, to ensure coherency.⁴ Communicability, transparency, and versatility are crucial pillars in the design and execution of curriculum, as they allow for continuous revision, evaluation, and modification without difficulty.^{5,6} These attributes are frequently neglected in favor of more prominent curricular components, including content, pedagogy of participation, and assessment.⁷

Curriculum mapping is an essential active process that allows holistic spatial visualization of the various parts of the curriculum's interrelationships and connections.¹ The advantages of mapping are multifaceted, as it allows assessing the

Engineering C. L. Dunlop,1990 **Therapeutic Gazette** William Brodie, Francis Edward Stewart, John J. Mulheron, Albert Brown Lyons,1908 **Pedagogy of Humanization** Chelda Smith Kondo,2024-03-30 The purpose of Pedagogy of

Humanization Preparing Teachers for Culturally Sustaining Classrooms is to build a critical mass of educators who know how to employ the principles of critical pedagogy in elementary classrooms This includes attention to the various knowledge skills and dispositions required of critical pedagogues in their curricula instruction assessment classroom environment and relationships From Critical Race Theory CRT to restorative justice oriented classroom management the theoretical is made

practical Moreover the structure of the book follows the curriculum of a traditional teacher education program making it complementary to any teacher education course The Pedagogy of Humanization is the first book to bring together the practice how and theory what and why of inclusive and asset based teaching In this book a group of teacher educators across disciplines explore their personal and professional identities to reveal the potential for applying each tenet of culturally relevant pedagogy in their respective fields Filled with anecdotes exercises user friendly theories and examples readers will learn how teachers can humanize themselves to have the capacity to be effective teachers of children who have been dehumanized and underserved by traditional teaching and schooling Pre service teachers will read this book so that they can connect the material they study in teacher education courses to the daily work of being an educator who aims to be justice oriented However this is not a foolproof guide or how to manual that could be completed without direct support from mentors and colleagues Instead readers will practice the sort of engagement in individual and community growth that ignites the possibility of teaching as a force for social change In many ways chapters of the text could be used through a flipped classroom approach whereby faculty invert the typical cycle of content acquisition and application The book will prove to be a valuable resource as a teaching text in classrooms devoted to critical pedagogy Critical Race Theory social justice and other topics necessary to produce teachers who are prepared to maximize their effectiveness in educating today s students
