## Cli Fi Novel Advanced Strategies:

**Cli-Fi and Class** Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures. Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature. As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged. Cli Fi and Class focuses on the representation of class dynamics in climate change narratives. With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad, Cormac McCarthy and Octavia Butler to the film Black Panther and the Broadway musical Hadestown this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn.

**Reimagining Science Fiction** Gary Westfahl, 2025-10-31 In the first decades of the twenty first century science fiction literature has been transformed in many ways as the genre has reacted to the dominating influence of films, television and video games, the growing popularity of fantasy, the rise of young adult science fiction and graphic novels, the impact of the internet and social media and the increasing diversity of the authors, characters and often non Western settings. The essays making up this volume address these and other changes in two ways. Some consider new critical approaches to science fiction in response to changing circumstances including analyses of how evolutionary psychology explains today's science fiction, the emerging subgenre of cli fi exploring the effects of climate change, the use of science fiction in different areas of the college curriculum and a statistical method for identifying works of science fiction. Others examine significant new authors such as Nalo Hopkinson, Charles Stross, Paolo Bacigalupi, Suzanne Collins, Mira Grant, John Sandford and David Mura. Contributors include science fiction author Howard V. Hendrix and experts in the fields of Chinese studies, gender studies, literature, philosophy and religion.

**Writing the Past in Twenty-First-Century American Fiction** Alexandra Lawrie, 2022-07-11 Writing the Past in Twenty First Century American Fiction examines contemporary novels profoundly shaped by a sense of historical consciousness. Authors including Ben Lerner, Colson Whitehead, Dana Spiotta, Hari Kunzru and Garth Greenwell each use flashbacks, historical parallels and non sequential narrative arrangements to emphasise the re emergence in a twenty first century context of historical structures and circumstances. This study explores how these frequent moments of temporal slippage amount to a falling out of time as characters are forced to confront the past crises which continue to exert pressure on their own contemporary moment.

**Questioning Borders** Robin Visser, 2023-09-12 Indigenous knowledge of local ecosystems often challenges settler colonial cosmologies that naturalize resource extraction and the relocation of nomadic hunting, foraging or fishing peoples. Questioning Borders explores recent ecoliterature by Han and non Han Indigenous writers of China and Taiwan, analyzing relations among humans, animals, ecosystems and the cosmos in search of alternative

possibilities for creativity and consciousness Informed by extensive field research Robin Visser compares literary works by Bai Bunun Kazakh Mongol Tao Tibetan Uyghur Wa Yi and Han Chinese writers set in Xinjiang Tibet Inner Mongolia Southwest China and Taiwan sites of extensive development migration and climate change impacts Visser contrasts the dominant Han Chinese cosmology of center and periphery that informs what she calls Beijing Westerns with Indigenous and hybridized ways of relating to the world that challenge borders binaries and hierarchies By centering Indigenous cosmologies this book aims to decolonize approaches to ecocriticism comparative literature and Chinese and Sinophone studies as well as to inspire new modes of sustainable flourishing in the Anthropocene
