(*Applied Chemistry*) Various, 2020-12-17 Henley's Formulas, Recipes and Processes is a compilation of ten thousand selected household and workshop formulas, recipes, processes and money saving methods for the practical use of manufacturers, mechanics, housekeepers and home workers. Each recipe from this book is to be regarded as a basis of experiment to be modified to suit the particular purpose in hand or the peculiar conditions which may affect the experimenter. Chemicals are not always of uniform relative purity and strength; heat or cold may markedly influence the result obtained and lack of skill in the handling of utensils and instruments may sometimes cause failure. In some instances a series of formulas is given which apparently differ but slightly in their ingredients. This has been done on the principle that one or more may be chosen for the purpose in hand. Apart from the modern methods and formulas, old recipes and so-called trade secrets which have proven their value by long use are also included in this useful edition. *Cooking in Europe, 1650-1850* Ivan P. Day, 2008-11-30 From the Baroque Era to the Victorian Era, 1650-1850, unprecedented changes took place in the food ways and dining habits of European society. This daily life aspect of history comes alive for students and food enthusiasts as they read and try out these recipes, most translated into English for the first time. There are nearly 200 recipes organized overall by the mini-periods of the Baroque and Rococo Era, the Reign of Louis XV to the French Revolution and the reign of Napoleon to the Victorian Era. Author Ivan Day, a renowned food historian who specializes in meticulous recreation of these amazing dishes for museum exhibitions, makes them accessible with clear explanations of techniques and unusual ingredients. Recipes include examples from France, Italy, England, Austria, Germany, Holland, Portugal, Spain, and Scotland, from the simple Salad of Pomegranate from La Varenne's 1651 cookbook to the elaborate Boar's Head in Galantine of Careme's 1833 cookbook. This unique cookbook is a culinary treasure trove to complement all European History library collections. As Day shows in his narrative and recipes, the principal theme in the story of food during the two centuries is the rapid spread of French fine cooking throughout Europe and its gradual percolation down the social scale. However, despite the domination of French cuisine at higher levels, most nations managed to cling proudly to their own indigenous traditions. A lively introduction explains the dramatic shift in culinary taste led by the exuberant creativity of French cooks. Cookbooks started to emerge from the Paris printing presses after a hundred years of silence. Numerous innovations completely transformed French cuisine and swept away all remnants of lingering medieval taste. There were new efficient cooking techniques for the kitchens of powerful and wealthy. For all, there were new ingredients from the New World and new cooking mediums such as the mechanical spit and roasting ranges that made cooking cleaner and less back-breaking. The recipes, each with a short explanation, are organized by type of dish. Categories include salads and cold dishes, soups, meat, poultry, fish and seafood, vegetables and fungi, eggs and dairy, sauces, savory pastries, starches, pastas, and legumes, breads and cakes, sweet pastries and puddings, fruit, nuts, and flower preserves, sweets and confections, jellies and ices, and drinks. Occasional sidebars offer period menus of, for example, elaborate feasts. A glossary and an appendix listing suppliers of equipment and ingredients are added.
